SKILLS

- Proficient in HTML, CSS, and JavaScript, with experience building web applications using React.
- Proficient in using GitHub for version control.
- Familiarity with server-side web development using Node.js and Firebase, with understanding of REST APIs and HTTP requests using Postman.
- Solid foundation in web design tools such as Figma, Adobe Xd, and design tools like Photoshop.
- Good knowledge of Spline 3D, can create awesome visualizations.

DESIGN SKILLS

Figma
Adobe Xd
Photoshop
Spline 3D

INTERESTS AND HOBBIES

- Gaming
- Photography
- Archery
- Hiking and camping
- Kayaking

EDUCATION

Aurora Development OÜ
"JavaScript & React: From zero to Front-end specialist"
Course certification
December 2022 - February 2023

Tallinna Ehituskool
Construction Engineering
High school degree
Graduated 2017

RECENT WORK EXPERIENCE

Bolt Technology OÜ

(December 2021 – Present | Tallinn, Estonia)

Customer Support Specialist

- Provided technical support to drivers, ensuring their needs were met and issues were resolved in a timely manner.
- Managed new drivers and activated their accounts, conducted background checks and ensuring compliance with company policies and country's regulations.
- Maintained and managed driver profiles, ensuring accurate and up-to-date records were kept.
- Worked with ZenDesk, InfoBip, and various other CRM tools, demonstrating a strong ability to learn and adapt to new technologies and tools.

KANGO - Global Activities Association

(September 2020 – Present | İstanbul, Türkiye)

Crew member and project assistant

- Managed youth exchange programs and connected youth from around the world.
- Worked as a photographer, capturing high-quality visuals of events and activities.
- Participated in multiple Erasmus+ projects.
- Established connections with individuals from diverse cultural backgrounds through 10-day projects.
- Built strong relationships with team members and participants.
- Built strong passion for global citizenship and cultural exchange among youth.

TimberElement OÜ

(June 2020 – December 2021 | Tallinn, Estonia)

Production Specialist

- Built wooden elements for residential buildings using power and hand tools and auxiliary instruments with high precision.
- Interpreted woodworking blueprints and project specifications to ensure projects met design requirements.
- Demonstrated strong project management skills by determining material needs, estimating costs, and prioritizing tasks to reduce project delays.
- Installed windows, doors, framing, and trimming with precision and alignment.
- Prepared regulatory compliant documents for new buildings and additions to existing structures.

Starship Technologies OÜ

(November 2018 – April 2020 | Tallinn, Estonia)

Hypervisor Team, Operations Team, Mapping team, Field Assistant

- Managed delivery robot fleets in the US, UK, Germany, Finland, and Estonia, ensuring optimal performance and minimal downtime.
- Monitored and controlled autonomous robots, ensuring optimal performance and adhering to safety protocols in difficult traffic situations.
- Developed and mapped global navigation routes for robots, using advanced tools and data analysis for accuracy and efficiency.
- Tested software and features to enhance performance and diagnosed problems for necessary changes.
- Trained and mentored 20+ new operations team members, improving efficiency and mapping.
- Maintained compliance with industry regulations and safety standards for safe and reliable robot operations.

Estonian Defence Forces

(January 2018 – November 2018 | Tallinn, Estonia)

Military Police

- Served as Military Police personnel, 11 months of service in Tallinna Vahipataljon.
- Expertise in maintaining law and order, conducting security checks, and providing assistance to military personnel.

Awarded "The Wolf of the Honor Guard" badge for exemplary ceremonial service, demonstrating a strong attention to detail and precision in executing tasks

Starship Technologies OÜ

(July 2017 – January 2018 | Tallinn, Estonia)

Field Assistant

- Maintained and repaired autonomous delivery robots.
- Ensured safety in difficult traffic situations, successfully navigating robots through challenging urban environments.
- Mapped navigation routes for robots, by following and controlling robot on the field.
- Tested software and features to enhance performance and diagnosed problems for necessary changes.

Represented the company at Robotex 2017 in Tallinn as a Starship representative, showcasing the advances in our autonomous delivery robot operations.
